

CARTRIDGES FROM

Static Control®

Static Control offers a full range of premium aftermarket new build and remanufactured cartridges. Our long history in engineering cartridge components provides a unique advantage of how to develop a superior cartridge solution.

Why Choose Static Control?

Static Control's distinctive approach to cartridge development enables you to confidently address the latest profit opportunities in the laser cartridge aftermarket.

Our proprietary technology and stringent quality control are included in every cartridge we sell. This is what makes our cartridges stand out in a sea of other cartridge choices.

- Global leader in aftermarket cartridge technology
- Highest level of technical expertise
- Access to exclusive and first-to-market products
- Knowledgeable on the latest technology trends and market challenges
- Constant investment in R&D since 1987
- Award-winning customer service, sales & technical support

RoHS

Choose the Best Path for Your Business

Static Control's new built and remanufactured cartridge lines are built using over 30 years of knowledge. All our cartridges deliver unmatched quality and consistency.

- First-to-market cartridges
- OEM-comparable print performance
- Always IP considerate
- Firmware resistant chips
- In compliance with current standards and regulations (ISO, Reach, RoHS, WEEE)

Whether you need new built or remanufactured cartridges, Satic Control has you covered!

NEW BUILT CARTRIDGES:

We have the best compatible cartridges in the industry thanks to our unmatched quality control and automated processes! Maximise your profits today with our first-to-market solutions, built with Static Control technology inside each cartridge.

REMANUFACTURED CARTRIDGES:

Our remanufactured cartridges are built with our 30+ years of component knowledge, delivering a premium performance that is unmatched in the industry.

Our team has one global mission - to provide quality service while designing, producing and distributing premium imaging solutions to communities around the world.
